FIVE REASONS WHY WHEAT PRODUCERS SHOULD SUPPORT THE WHEAT POOL

1. Because your self-protection as a producer is incomplete and ineffective if private organizations can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middlemen and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers.
4. Because the co-operative principle of "each for all, all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throughout the world.
5. Because the farm workers ought to concentrate their resources in co-operation instead of supporting capitalistic organizations hostile to co-operative movements.

LOCAL NEWS.

Mr. Jacob Miller returned this week from Wembley

Mr. Ernie Bell, an old-time resident of Stony Plain district, was a visitor here, on Tuesday.

Mr. John Armbruster is the proud possessor of a handsome new Oakland sedan, purchased from Sommerfeld and Mayer.

Mr. Jack Walsh, the popular tapman at the Royal Hotel for some time past, has accepted the position of manager at the Central Hotel, Lloydminster, and left Sunday to assume his new duties.

Mr. Adolf Miske and party spent a few days this week at Lake Wabamun, fishing.

Mr. and Mrs. M. Comisarow motored down to Leduc on Sunday.

Contractor Pailer has been making alterations to the old Oemingating place, which will now be used as an adjunct to the Berliner restaurant.

R. C. services will be held in the Town Hall on Sunday next at 9 a.m.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M. M. Mecklenburg, eye specialist, will be in Stony Plain on Friday, June 22.

On a Busy Saturday Evening

The time made in the fat man's race at Holborn on Victoria Day was knocked in the shade Saturday evening when a fat man chased down Main street about 10.18 p.m.

At this time the local power house was enveloped in a heavy cloud of black smoke, the air was filled with the pungent odor of something burning, while a splendid display of fireworks was issuing from the rear-end, the sparks mounting some 30 feet in the air, approximately.

Following on this, the street lights got scared and lit out, while the twin frosted drop lights in Henry Sinner's barber shop were throwing just enough light to make the darkness visible.

A crowd gathered in the lumber yard to watch the pyrotechnics at the power plant, wondering what was going to happen next. On someone mentioning the possibility of an explosion, the timid souls in the crowd beat it up street.

A local authority on engines intimated that the occurrence may have been caused by the partial eclipse of the moon or to the presence of a dead fly in the crude oil fuel used.

East Is Coming West

The recently announced decision of the General Motors Corporation of Canada to proceed immediately with the erection of a million dollar manufacturing and assembly plant at Regina is gratifying news, not alone to the citizens of the capital city of Saskatchewan, but to all Westerners, because it indicates that at long last the leaders of industry in the East have come to a realization of the fact that they cannot continue indefinitely to supply the rapidly growing western market from factories located thousands of miles away, and compelling the western purchaser to pay greatly enhanced prices by reason of freight charges based upon the high classification imposed upon finished articles.

Western people have contended for some time now that the logical industrial development in Canada is the establishment of branch factories in the West. There was a time, not more than a couple of decades ago, when the view prevailed that the western market could be supplied not only from Eastern factories, but from Eastern wholesale houses. Gradually, as western population grew and the volume of business increased, branch wholesale houses were opened in Winnipeg, and since they have gradually spread all over the West, until today wholesale establishments located in all the larger western centres of population very largely supply western needs.

The same development which thus characterized the business of wholesaling and distribution must inevitably now follow in the work of manufacturing itself. Freight charges on the transportation of necessary raw materials into the West will be substantially lower than charges on the finished products, while the opening of western factories may, and in all probability will, encourage the production for use of certain raw products of the West which today lie undeveloped because of a lack of market.

The decision to locate branch industries in the West is furthermore pleasing to Western people because it indicates recognition by Eastern industrial leaders of the fact that if they are to command the support and sympathy of the West, and if past lines of separation between east and west are to be wiped out, and a new national viewpoint developed, the East cannot continue to merely accept the cream of western trade and profits in years of good crops and times of plenty, but must come west and throw in their lot more wholeheartedly with the people here and, while benefiting in years of abounding prosperity, also carry their share of the burden in years of slim crops and business depression.

With wonderful activity prevailing in the work of prospecting and developing the immense mineral areas of the northern portions of the three prairie provinces, with large schemes of power development now receiving attention, and with the new, larger, more national viewpoint gaining headway among the financiers and industrial leaders of the East, there is every reason for saying that a new era in the history of Western Canada is opening.

While the West will long continue to excel as an agricultural country, and will steadily expand its annual production from its rich prairie lands, it seems safe to predict that from this time onward industrial development will move along in keeping with the agricultural growth and mineral development of the country.

Such development offers the best and most practical solution of one of the West's big problems, namely, the unemployment difficulty which annually presents itself because of the seasonal nature of the basic industry of this country. In this connection it is pointed out that the "peak" period of production in Regina's new industry will be in the late winter and early spring months, before active outdoor building operations, railway construction and road making gets under way, and when under present conditions unemployment is at its maximum.

Viewed from all standpoints, therefore, the whole West can unite in welcoming the momentous decision of one of Canada's greatest industrial concerns to establish a large branch plant in the heart of the prairie west. Its action will be but the forerunner of many similar decisions by other large manufacturers, and a resultant development from which every Western centre, and every Western citizen, will benefit.

Gold Medal For Edison

Its 1928 gold medal for Science has been awarded by the Society of Arts and Sciences to Thomas A. Edison, the inventor. Plans for a large public testimonial in New York when the Medal is formally presented to Mr. Edison are nearing completion. It is expected that the event will bring together ambassadors of foreign governments and head of leading scientific societies, universities and industries.

Federal Income Tax Collections

Federal income tax collections for the fiscal year 1927-28 totalled \$56,570,972, an increase over the preceding year of \$9,000,000, in spite of the reduction in the income tax last year. Montreal's share of the payments was \$17,374,963; Toronto's \$13,320,640, and Vancouver's \$5,440,359.

Children may cry for the moon until they get big enough to want the earth.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been recommended for 60 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acid, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Alberta Sells Railway

Purchasers Obtain Rights and Titles To the Lacombe and North-western Railway

A cheque for \$1,510,582.50, turned over to the provincial treasurer of Alberta, by the Canadian Pacific Railway, on May 10th, purchased the Lacombe and Northwestern Railway. The company obtained full possession, right and title of the latter property, with all securities and capital stock of the land of the company. The new directors are: D. C. Coleman, vice-president of the Canadian Pacific; G. A. Walker, solicitor at Calgary; George Fox, superintendent at Edmonton; J. D. Porter and George Hutton.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them, Mrs. Charles Hutt, Tancook Island, N.S., writes:—"I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so." Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by Dr. Williams' Medicine Co., Brockville, Ont.

Great West Airways

First Commercial Flying Company On Prairies Is Established At Calgary

Backed by many of Calgary's prominent citizens, managed by Capt. F. H. McCall, D.S.O., M.C., D.F.C., and known as the Great West Airways, Limited, the first commercial flying company on the prairies west of Winnipeg, is expected to be in operation within one month, with Calgary as base. It is announced. The objects of the company are to carry on the business of aviation in all its branches, including the giving of instruction to pilots and air engineers.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

New Market For Purebred Hogs

B.C. Branch Of Canadian Swine Breeders' Association Organizing Market In Antipodes

For the past year the secretary of the B.C. branch of the Canadian Swine Breeders' Association has been engaged in seeking new markets for purebred hogs, paying special attention to Australia and New Zealand. As a result many demands have been received, interest being stimulated by New Zealand's removal of the embargo on stock with a clean bill of health.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Britain's Air Mail Grows

Air mail activities in Britain are growing rapidly. Letters dispatched from London last year totalled 27,000 pounds, as compared with 17,000 in 1926. Air parcels were 74,000 pounds in 1927, and only 55,000 pounds in 1926. Ten thousand pounds of letter mail were carried to European destinations alone in the past 12 months.

The outcome of a basketball game and buckwheat cakes depends upon the batter.

Air Patrol On Hudson Straits

Straits Open For Navigation Much Earlier Than Even Friends Of Route Anticipated

Flying operations have been resumed in Hudson Straits, and reports from the air bases reveal that the ice has already cleared out of the eastern end of the channel and is broken up in the centre and western sections. It is the opinion of the air-men and marine officials stationed in the straits that an ice breaker could open a channel right through the straits at present. No ice breaker is available, but the department announces that a vessel of this type will be available before next spring.

The time when the straits will become easily navigable is as yet doubtful, but it is quite clear that ice conditions are not nearly as heavy a handicap as has always been supposed and that the straits will be open much earlier than even the friends of the route anticipated.

For Farming Leases

Already there are 500 applicants for fur-farming leases in the swampy St. Paul de Metis district of Alberta, recently made available for fur-farming purposes.

A reliable antiseptic—Minard's.

The cost of the Suez Canal was about \$127,000,000.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabaster.

SEND FOR FREE BOOK

Canada Gyproc and Alabaster Limited, Winnipeg, Canada. Please send business free booklet, "Walls that Reflect Good Judgment," which contains valuable information on Gyproc for farm use.

Fireproof Wallboard

Prediction Is Made That Canada Will Eventually Produce A Billion Bushels of Wheat a Year

A few days ago Hon. T. A. Crerar, former Federal Minister of Agriculture, made the prediction that Canada would eventually produce a billion bushels of wheat a year and find a market for it. At first sight, says The Globe, this appears to be a tremendous volume, but is in reality not much more than twice the crop produced by the Dominion at the present time. Since approximately 94 per cent. of the wheat crop of Canada is raised in the Prairie provinces this territory would presumably be looked to for the attainment of this figure. This raises the question of the potentiality in agricultural development of the Prairie provinces, and it may be mentioned that in the past quarter of a century the wheat production of this area has increased nearly twenty-fold.

At the time of the 1921 census, but 59.2 per cent. of the possible farm land in Manitoba was occupied; 47.1 per cent. in Saskatchewan, and 50.2 per cent. in Alberta. These proportions have not altered drastically since, as new settlement for the main part has been directed to established communities. In a consideration that it is only about 50 years since the first homestead was filed upon in the area, and the first quarter of Canadian Pacific Railway land sold, the transformation of the area has been remarkable, and presages the development of the next quarter of a century with a marked amelioration effected in all conditions affecting colonization.

When a census of the Prairie provinces was taken in 1926, it was found that there were 248,168 occupied farms in the territory, 53,251 being in Manitoba, 117,787 in Saskatchewan, and 77,130 in Alberta. The total area occupied by farms was 88,029,493 acres, which makes the extent of the average farm throughout the territory approximately 350 acres. These farms, which half a century ago or so were unsettled and unproductive, the buffalo ranging over them and the Indian pitching his teepee there, given away or sold at infinitesimal figures, have a high value by reason of their productivity. Occupied farm lands in the Prairie provinces are the cheapest of their kind in the world, being valued at \$27 per acre in Manitoba, \$26 per acre in Saskatchewan, and \$28 in Alberta. Yet at these low figures occupied farm land in Manitoba has a total value of \$389,113,119; Saskatchewan, \$1,184,759,090; and Alberta, \$800,042,000. In consid-

ering the scope of expansion it is to be noted, too, that, according to the 1926 census figures, but 50 per cent. of the acreage of occupied farms has yet been improved.

Already the revenue going to farms in this area is tremendous. This has been particularly true of the past few years of fine crops, and good prices, which have placed the farmers of that territory in a very enviable position. Field crops alone, which account for about 85 per cent. of the agricultural revenue of that territory, returned in 1927 the sum of \$464,087,300, Manitoba receiving \$82,280,000; Saskatchewan, \$309,064,000; and Alberta, \$272,743,300. This would indicate that the total agricultural revenue of that territory was in the neighborhood of \$550,000,000.

Grain Shipment From North

Marked Increase Over Alberta Lines Shown in Last Report

A goodly volume of grain is still trickling out of the northland over the Alberta government railways, according to the latest figures furnished by officials of the lines. The period covered by the latest report is from August 1, 1927, to May 14, 1928. For the purposes of comparison, figures for the same period of the previous crop season are also appended. Over the Edmonton, Dunvegan and British Columbia railways, a total of 9,736,747 bushels of grain has been hauled south, as compared with 5,439,502 bushels for the same period of the preceding year.

The Alberta and Great Waterways railway has a total of 1,205,574 bushels hauled out, with a total of 440,429 bushels for the same period of the previous crop season.

Newspaper Up-To-Date

"The news of England we tell the latest, writ in perfect styling publish, and most earliest do a murder commit we hear with it and publish for it. Do a enormous chieftain die we printulate it and in borders somber with black, so black. Stuff has each one all been colloged and writ like the Kipling, the Wells, and the Dickens. We circle every one of them towns and nor do we extorionate for the advertisements not."—From a Chinese Newspaper.

Farmer: Come on, I'll show you how to milk a cow.
Novice: Perhaps I'll better start on a calf.

Steel Cable Cuts Rock

A long steel cable drawn at high speed and fed continually with wet sand, cuts through bony rock in a new type quarry saw. Tiny grains of sand, dragged across the rock face, serve as abrasives to groove it at a rate hitherto unknown.

Would Use Molten Steel To Break Big Icebergs That Menace North Atlantic Shipping

Making Hazardous Trip

Tyne Workmen Going To Singapore On Floating Dock

On a great floating dock, built for the naval base at Singapore by Swan, Hunter, and Wigham Richardson, Ltd., in ten months, a number of Tyne workmen have embarked on a hazardous voyage from the Tyne to Singapore. The dock, which was inspected at Wallsend by Admiralty officials and engineering experts, is 885 feet long—one of the largest in the world. Three and a half million rivets were used in its construction. It was reduced to sections, which will be towed across 8,500 miles of ocean. The voyage will take four months, provided no storms are encountered. One of the most anxious periods will be the passage through the Suez Canal. There will be a margin of only two or three feet of water between either side of the dock and the embankment. The greatest navigating skill will have to be exercised, as the slightest deviation from the course will spell disaster.

Has Variety Of Uses

No Part Of Soya Bean Need Be Wasted

The ingredients of the soya bean are such that, taken as a whole, it is one of the finest foods. It is "ground" just like wheat, but the flour it forms is many times more nutritious than wheaten flour. From the bean can also be obtained an artificial "milk," which closely resembles and possesses many of the properties of ordinary cow's milk. The variety of uses for soya bean products makes waste almost impossible. What remains after oil or rat has been extracted can all be made into cattle fodder. It seems a far cry from a bean to a billiard table or an explosion, yet the soya bean provides the raw materials for many familiar objects, ranging from billiard balls to high explosives.

Improvements On Western Farms

According to a recent census of the farms of the Prairie Provinces, 40.9 per cent. had automobiles; 34.5 per cent. had telephones; 25.5 per cent. had gasoline engines; 21 per cent. had tractors; 2.2 per cent. had auto trucks and 2.1 per cent. had electric light.

Thomas A. Edison set army experts to seek some device whereby poison gas will be used with animal traps.

White-hot steel can split icebergs into harmless fragments and break up huge ice jams along the North Atlantic steamer route, says Howard T. Barnes, professor of physics in McGill University, Montreal, in a research report to the Engineering Foundation.

Since 1892, Professor Barnes has been making scientific investigations of the physical properties of ice and practical methods of controlling it. The energy from molten steel, he shows, supplies rays that equal or surpass those of the sun in power to penetrate ice.

"For a reasonable expenditure the menace of icebergs can be removed from the North Atlantic steamer route," the scientist asserts. "Also by skilful engineering utilization of physical researches extending over 35 years, the great expense caused by ice at power plants, bridges, and many other structures and the damage from floods caused by ice dams, or jams, can be greatly reduced."

"Ice can be broken up by blasting or reduced to water by heat, or disintegrated by the aid of chemicals. Quick-acting, sure, powerful, inexpensive methods are required. To supply artificially enough heat to melt a berg or jam is beyond the range of feasibility. Skilful, limited applications of heat will, however, accomplish much."

"Thermit can be used effectively at modest cost. Thermit is a mixture of finely powdered aluminum metal and oxide of iron. When properly ignited, it reacts vigorously, generating very high temperatures and producing extremely hot liquid steel. Thermit say be seen in action in city streets where rail joints of a trolley line are being welded."

"The energy from this molten steel supplies rays that equal or surpass those of the sun in power to penetrate ice for many feet. The action of the white-hot steel upon the ice is remarkable, converting it into hydrogen and oxygen gases so rapidly that a powerful explosion results."

"In this way a huge jam may readily be broken up so that it will float piecemeal harmlessly down the river, or an iceberg be split into fragments so small as to be no menace to commerce."

New Assistant—"What shall I do first?"

Proprietor of Clock Store—"Wind up the business."

W. N. U. 1737

Messages of congratulation from all parts of the empire poured into Buckingham Palace upon the occasion of the 61st birthday of Queen Mary, on May 26. The passing of another milestone serves to recall the many changes which her majesty has seen. The eldest child of the Duke and Duchess of Teck, she lived her early days in England in a Victorian atmosphere. The best features of the old tradition now survive in her own court. Originally the Princess Mary, as she was then known, was engaged to the Duke of Clarence, eldest son of Albert Edward, Prince of Wales, who later became King Edward VII. A month before the date of the wedding, the duke died of influenza. The princess was, however, such a favorite with Albert Edward that he arranged that she should marry his second son, George, Duke of York, who is now King George V. The ceremony was performed in St. James' Palace on July 6, 1893. On May 6, 1916, King Edward died, and on June 22, 1911, the coronation of the present monarch was staged at Westminster Abbey with a wealth of pageantry. (1) shows the queen in state dress, wearing a diamond tiara and a profusion of jewels; (2) is her majesty on a shopping expedition; (3) is a picture of the queen taken before her marriage thirty-five years ago; (4) is the king in his uniform of colonel-in-chief of the Black Watch. His birthday was celebrated on June 3, when he was 63 years old; (5) is a picture of the queen taken when she was Princess Mary of Teck, and when wau-wau-wau were the yodels in the world of fashion.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

Before entertaining us to lunch Mr. Marsh gave a very informative and comparative talk on the British bacon industry, illustrating his remarks with a number of sides of bacon from many different countries and special cuts arranged for our use.

From the Marsh and Baxter plant we proceeded direct to Birmingham, where we were received by the Lord Mayor, Alderman A. H. James, C.B.E., J.P., after which we were taken through the magnificent City Hall and shown some of the art treasures there. In the evening we saw a charming musical comedy, "Up with the Lark," a block of the best seats in the house having been reserved for us.

Sunday was spent quietly in Birmingham, our itinerary including a motor tour of the environs of the city and a talk on Denmark by Mr. J. Nugent Harris, of London. Mr. Harris had lived for some years in Denmark, and his love for that country shone all through his delightful address, which was accompanied by remarkable selection of Danish slides.

On Monday morning, after a brief tour of the Birmingham Market, we proceeded south to Kenilworth Castle, one of the most extensive baronial ruins in England. Kenilworth dates from 1120 and was presented in 1562 by Queen Elizabeth to her favorite, Robert Dudley, who was wont to entertain her there in magnificent style. Our next stop was Warwick. Warwick Castle, described as the "most princely seat in the Midlands," is still occupied by the Warwick family. Warwick is a fine old country town with winding streets and ancient buildings. The castle, which was visited by some of our party, dominates the town. The earliest building dates from the 10th century although the present castle is 15th century.

Shakespeare's country is a few miles from Warwick. The house in which Shakespeare was born remains little altered, and wandering through the rooms we saw on walls and ceilings the signatures of many famous visitors, amongst them Scott, Carlyle, Thackeray and Browning. The village of Stratford-upon-Avon is about a mile away. It was a delight to visit this beautiful and well preserved old place, today the property of the nation. The cottage contains much of the old furniture and many of the old fittings. We also visited Holy Trinity Church, and among the trees on the bank of the Avon, here Shakespeare is buried and here also is the grave of his wife. The night in which Shakespeare was christened is still to be seen in this church and the parish register, containing a record of his birth on April 26th, 1564, and of his death on April 26th, 1616, is also preserved.

Our stay at Oxford was short, but we were fortunate in being able to stroll through the grounds of one of the colleges and in seeing the memorial to the poet Shelley. The statue, beautifully wrought in marble, shows the drowned poet lying exactly as he was found after having been washed up by the sea. When we stepped up his stark realism created a sensation.

Our next stop was at Windsor Castle, which is still used by the Royal Family. Here we were privileged to see the State Apartments, the magnificence of which words fail to describe.

The castle overlooks the River Thames and has been the place of residence of English kings for centuries. Here James I., of Scotland, King John, of France, and King David I., of Scotland, were held prisoners, and in one of the gardens James I. saw from his prison John Beaufort, his future wife.

A vault in the castle in which repose the remains of Henry VIII., Charles I., and Queen Jane Seymour, is connected by a subterranean passage to another vault where are buried George III., George IV., William IV., and Edward VII. Queen Victoria and her daughter, Princess Alice, are buried in Frogmore Mausoleum, which lies near the park adjoining the castle.

Near Windsor Castle is Eton College, which was founded by Henry VI., in 1540. From Windsor we proceeded to the King's farm, to be shown over the buildings by Mr. Murray Conacher, the manager. Mr. Conacher paraded some of the King's Prize Herefords and showed us fine examples of Devon and Jersey breeds. The Royal Farm is 1,200 acres in extent. Before leaving we were entertained to a delightful tea in the Royal Dairy. This was our last stop before London, and excitement was at fever heat as we proceeded down the magnificent main road leading from Windsor to the Metropolis. Night was falling as we threaded our way through the streets of London. Double deck buses with which we were to become more familiar in London, began to make their appearance as we reached the outskirts of Greater London. At last after passing many unbroken miles of buildings, we found ourselves in Oxford Street, near Regent Street, and finally at our hotel, the "Regent Palace," just off Piccadilly Circus in the very heart of the West End.

We rose bright and early on our

first day in London, for we had seven engagements facing us, including the reception by His Royal Highness, the Prince of Wales. Our first trip was to Covent Garden, once the garden and burial ground of monks, but now London's greatest distributing centre for fruit and vegetables. Here we were given our first inkling of the enormous consuming power of the people of Greater London, for we saw before us one day's supply of fruit and vegetables for a population equal to Canada. It was easy to believe that one province of Spain alone sent 4,000,000 cases of oranges to this great market, and a great pleasure to learn that some varieties of Canadian apples had won a leading place in public favor.

Our next engagement was to visit the Cockspur Street offices of the Canadian National Railways, where we were cordially received by Mr. C. J. Smith, the European Vice-President, together with his department chiefs. The run of this fine building, owned by the C.N.R., was given to us, and we had the pleasure of seeing the latest copies of Canadian papers. An interesting feature of the fine offices, which house a busy staff of some one hundred people, is a magnificent mural frieze by Frank Brangwyn, R.A. (To Be Continued.)

No Rest With Asthma.—Asthma usually attacks at night, the one time when strength is weak. Hence the loss of rest, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Wool Prospects Good

Substantial Increase In Export Of Wool From Canada

A very substantial increase is to be noted in the export of wool from Canada in the last fiscal year. This increased from 5,223,981 lbs. worth \$1,538,960 the year before, to 11,140,101 lbs. worth \$3,449,967.

According to the Canadian Co-operative Wool Growers, Limited, wool prospects are very good with the condition of the new wool bright and the shrinkage average. Foreign market conditions are also reported excellent.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? In the dressing of Thion Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

Recipes For This Week

(By Betty Barclay)

SCALLOPED DISHES

Four over layers of well-seasoned meat, fish or vegetable enough medium cream. Sprinkle each layer well with buttered crumbs and bake until brown. When combined with starchy dishes such as potato or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour, and 2 tablespoons butter. Thin cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

ORANGE STRAWBERRIES

- 1 box strawberries.
- Julie 2 oranges.
- 1 cup sugar.
- 1 cup heavy cream.
- 2 tablespoons powdered sugar.
- 1/4 teaspoon vanilla.

Wash and hull strawberries, cover with orange juice, mixed with one cup sugar, and chill thoroughly. Serve in champagne glasses. Beat the cream until stiff. Add powdered sugar and vanilla, and with the pastry-bag and tube, pipe a border around each glass.

Travelling Clinic In Alberta

Visiting Sparingly Settled Districts Where Medical Services Are Hard To Obtain

During the month of May, a travelling clinic, with two doctors, a dietitian and three nurses, is touring through the northern sections of Alberta. The travelling clinic is a new phase of public health work, developed to cope with conditions in sparsely-settled districts where medical and dental services are difficult to obtain. Where there are doctors or dentists, the clinic co-operates with them. It does schoolwork, work, examinations and, in special cases, minor operations.

Minard's Liniment for insect bites.

SUNDAY SCHOOL LESSON

JUNE 17

THE CRUCIFIXION

Golden Text: "God commendeth His own love toward us, in that, while we were yet sinners, Christ died for us."—Romans 5:8.
Lesson: Mark 15:16-47.
Devotional Reading: Isaiah 53:7-12.

Explanations and Comments

The Crucifixion, verses 27-29. — They led Jesus away to be crucified, going outside the city, as was the Jewish usage (Acts 7:58), to Golgotha. Golgotha means "the place of a skull." We call the spot Calvary, from the Latin word calvaria, skull. It was customary to give one about to be crucified a stupefying drink, and they offered such to Jesus, wine mingled with myrrh, but He refused it. Matthew says He tasted it and then refused it. Jesus regarded the suffering before Him as part of the cup which the Father had given him to drink, and He would drink it to the dregs.

The garments of the crucified—the headress, shoes, outer garment; girdle, and seamless inner robe—were the perquisites of the executioners, and the soldiers cast lots to see what each should have.

There were many like these soldiers, moved by the most pitiful tragedy, save by what they could get out of it. In the Great War, when nations gave their sons to the cause, and men themselves, and the nation poured out its money in a passion of service, the soldier thought only of his own greed. He had no call to service; he saw only a chance of getting rich, but his wealth is blood money.—Joseph Fort Newton.

It was on a third hour, nine o'clock in the morning, when they crucified Him. The accusation placed above Him on the cross was "The King of the Jews." This was the crime of which Jesus had been guilty, and by His inscription he sought to annoy the priests, who, as he expected, considered it an insult to themselves, John 19:21-22. That all who passed by might read it, the inscription was written in Hebrew, Latin, and Greek (John 19:19, 20), the languages spoken at this time throughout the civilized world.

On either side of Jesus a thief was crucified. Crucifixion was terrible and disgraceful enough in itself, but if Jesus had hung upon His cross with nothing near him to disturb the impression of His calm serenity and innocence, it might have happened that the people who stood and watched would have lost sight of the disgrace and would have felt the majesty of the sacrifice. Already that place of suffering might have seemed as glorious as it has seemed to the world since. But as it was, they went to the priests and dragged out two wretched culprits who were waiting for their doom. That there might be no doubt about the disgracefulness of the Saviour's sufferings, they hung Him between two thieves.—Phillips Brooks.

Don't Make a Toy Out of Baby—Babies Have Nerves—

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but no more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, carried, or even screaming, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Restlessness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used yearly show its overwhelming popularity.

With each bottle of Castoria, you get a book, written by Dr. J. C. Fitch, on "How to Get Baby to Sleep." Look for Cast. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

CONSUMERS OF BRITAIN HAVE NO FEAR OF POOL

Regina.—At the International Pool Conference held here, a message of goodwill was sent by the delegates from the British Isles.

Four distinguished visitors from England and Scotland told the conference of the desire of hundreds of thousands of co-operative consumers in the Old Land to remove the barrier that appears to exist as between the two classes of co-operatives and each work for the other in complete confidence with the one object in view—the creation of a truly co-operative body composed of both producer and consumer.

A. W. Gough, representing the English Co-operative Consumers' Organization, broke the ice on the question and told of the suspicion with which the creation of the wheat pools of Canada was viewed at the start. The Rochdale co-operatives, he said, had had bitter experiences in the last 70 years with trusts and combines, and the formation of the wheat pools had not appeared to them as a trust in another guise.

He frankly told how his organization had wondered whether it meant another effort to squeeze the co-operative consumer, whether one class of co-operative would be set against another. He added that the power which the Canadian pools possessed in the economic structure of the world was enormous. "And we wondered how you were going to use that power," he said.

Alarm, however, had given way to admiration. "I am satisfied after meeting your leaders, after listening to inspiring addresses, after hearing your general sales manager, to go back to my friends in England and tell them that the Canadian people have adopted the best method of handling their product co-operatively," he added, amid loud and prolonged cheering from the delegates.

Mr. Gough's colleagues amplified his remarks and Peter Malcolm of the Scottish co-operatives, caught the fancy of the audience by saying that his organization desired to join the wheat of Western Canada, raised and sold in a co-operative way, in order to use it in the bread co-operatively made by his people and sold to those who were in his co-operative society. "The vessels that bring your co-operative grain to us should return to you with our co-operative made goods," he said.

Not Wanted In England

Harry Thaw Is Refused Permission To Land At Southampton

Southampton, Eng.—Harry Thaw, arriving at Southampton aboard the Aquitania for a visit to England, was refused permission to land by the immigration officials, who had obtained a British visa before sailing but nevertheless was not allowed to land.

He was informed that the home office had issued an order of prohibition and it is supposed that he will be obliged to return to New York on the Aquitania.

To Honor Airmen

Winnipeg, Man.—In honor of four gallant pioneers of the air, four new stations in the western region of the Canadian National Railway have been named Fitzmaurice, Lindbergh, Alock and Hinchcliffe, and a fifth is to be called Endeavor, the name of the plane in which Walter Hinchcliffe and Hon. Elsie Mackay attempted to fly the Atlantic.

Expect Cable Conference Report

London.—The report of the Imperial Cable Conference, in which the Dominion governments are represented, will be made shortly, the Canadian Press has learned. It is believed the committee will produce some scheme for maintaining cable communications intact.

No Danger Of War

Toronto.—Sir John Aldrich, president of the Canadian Bank of Commerce, after an extensive trip in Europe, stated in an interview here, that he considered that there was no danger of another outbreak of war.

W. N. U. 1737

No Evidence Of Grafting

Immigration Inquiry Report Examines Members Of Parliament

Ottawa.—The parliamentary immigration inquiry report was tabled in the House of Commons. The document contains little of a drastic nature, but thirteen recommendations for the improvement of Canadian immigration activities in Canada.

Evidence in detail respecting the organization of the department of immigration was heard at thirty-six meetings of the special committee which conducted the inquiry. All phases of the department's immigration and colonization work—carried on both separately and in conjunction with governmental and voluntary organizations—were examined into and the testimony of a long list of witnesses was received.

Ald. M. J. Coldwell, Regina, who made charges last summer that members of Parliament had trafficked in special immigration permits, was numbered among the witnesses.

The report contains no findings of wrongdoing or trafficking in special immigration permits by members of the Federal Parliament or others. Tabling of annual returns at each session of Parliament showing particulars of these permits granted is, however, suggested. Steps to speed up British immigration to Canada by improving the overseas medical inspection system and the granting of assistance to young Canadian agriculturists similar to that given by the British authorities to British emigrants feature the report. Efforts towards reduced ocean passage and railway rates are also advocated.

Reindeer For Northern Canada

Would Supply Food For Eskimo Bands In Northern Areas

Ottawa.—Importation of herds of reindeer into the Mackenzie basin with a view to supplying food for the Eskimo bands which inhabit this remote part of Canada is being undertaken by the government.

In the House of Commons, when estimates of the department of Indian Affairs were under consideration, Hon. Charles Stewart, minister in charge of the department, told of provisions which had been suffered by the Eskimo in the past and the efforts which were being made to eliminate it.

Mr. Stewart also informed the House that the department was having some trouble providing relief for Indians in the Northern territories and declared something must be done, in co-operation with provincial governments, to provide hunting grounds outside the present reserves. If placed in competition with white men the Indian would starve to death.

Conducting Another Search For Fliers

Quebec Man Believes Nungesser and Coll Landed In Labrador

Quebec.—That he was morally convinced that the French fliers Nungesser and Coll had landed with their monoplane, White Bird, somewhere in the Labrador country and that he had the intention of conducting a new search party this summer in that district was the statement made here by Dr. Louis Cousinier, Dr. Cousinier has returned from Greenly Island, where he had gone to the rescue of the stranded crew of the Bremen. Dr. Cousinier said that the search party would be sent in specially equipped airplanes.

Many Nations Represented

Toronto.—It is expected that 65 nations will be represented in Toronto when the Baptist World Alliance holds its fourth congress here, June 23-29. About 7,000 delegates are expected, representing some 12,000,000 baptists throughout the world. The roll call of nations on Saturday, June 23, probably will be the most picturesque session.

Change Is Approved

Toronto.—Reorganization of the Canadian Dental Association with provision of an executive body in which all provinces will have representation, was approved at the annual convention. Dr. J. W. Clay, of Calgary, president, stated the change would make for a strong national body.

PRESENTED AT COURT

Miss Ruth Draper, the American actress, caused a stir in English society when she was presented at court. In the past the understanding has been that it was useless for any actress to seek presentation while she was still actively engaged in her profession, but court officials have pointed out that the general ban on stage folks has been a dead letter since the days of Queen Victoria.

Agree On Peace Pact

No Difference Of Opinion Between Canada and Britain

Ottawa.—There is no conflict of opinion between the Prime Minister of Canada and Sir Austen Chamberlain, British Foreign Secretary, with regard to the proposed Kellogg treaty for outlawing war.

This was made clear by Premier Mackenzie King in the House of Commons, when he replied to a question put by E. J. Garland, U.F.A., Bow River.

Mr. Garland had drawn the attention of the Prime Minister to his answer to C. H. Cahan, Conservative, St. Lawrence-St. George, on May 18, when Premier King declared that it was erroneous to suggest that the British Government could not sign the Kellogg treaty without the concurrence of the Dominions.

Premier King referred Mr. Garland to his communication to Mr. Kellogg where he had set forth that the treaty would be submitted to parliament.

Request For Railway Cars

None Available And Fish Shipments Accumulating At Prince Rupert

Ottawa.—A request for railway cars to carry an accumulation of halibut from Prince Rupert, B.C., to the Eastern markets was made in the House of Commons by J. C. Brady, Conservative, Skeena.

Within the last few days 490,000 pounds of halibut have been brought to Prince Rupert ready for market. Only three cars were available and these had been secured by U.S. shippers. He asked the Minister of Railways to take some action to assist the Canadian shippers to obtain cars.

Hon. C. A. Dunning, Minister of Railways and Canals, promised assistance.

Universities Elect Dr. Luig

Montreal.—Dr. G. H. Luig, dean of the faculty of arts of the University of Saskatchewan, Saskatoon, was chosen president of the National Conference of Canadian Universities at a session of this conference.

U.S. PRESIDENTIAL POSSIBILITY

The present United States secretary of commerce, Herbert Hoover, is regarded as the leading Republican candidate for the presidency of the United States. The above is the most recent portrait of Mr. and Mrs. Hoover taken at their Washington home.

Pass Estimates For Defence Department

Amendment Presented To House On Cadet Training Defeated

Ottawa.—When estimates of the Department of National Defence were before the House of Commons, Miss Agnes MacPhail, Progressive, Southeast Grey, moved that a vote of \$500,000 for cadet service be reduced to \$1. Miss MacPhail's amendment was declared lost and the item itself carried.

During the debate, Miss MacPhail asked Hon. J. L. Ralston, Minister of National Defence, how he accounted for the fact that his department was the only one which "interfered" with education which was under provincial jurisdiction.

To this the minister replied that no training was carried out without the consent of the provincial governments. No teacher was compelled to take cadet training nor were any of the schools under compulsion to do so. He declared the strongest advocates of peace were those who had done their share in military training in their youth.

Included in the votes were \$2,315,000 for the non-permanent militia; \$1,850,000 for the permanent force; \$1,723,000 for the naval services; \$1,068,000 for the Royal Canadian Air Force, and \$3,195,000 for civil air operations.

May Hold Exhibition Of Canadian Goods

Plan For Publicity Campaign In Britain Being Discussed

London.—Canadian products should become very well known in Britain if Parmelee's scheme succeeds. Exhibitions of Canadian products are going to be held in the near future at Birmingham, Aberdeen, Belfast, Manchester, Glasgow, Dublin, Leeds, and Bristol, and a striking publicity campaign will be put into operation. A permanent staff, composed entirely of Canadians, will be created in London so as to be ready at any moment to run exhibition campaigns on behalf of Canadian products. Canadian artists will design the stalling and posters.

Parmelee is staying two months in order to perfect the scheme, which has been welcomed by trading authorities and the British government as a noteworthy enterprise.

Burial Of Hon. C. W. Cross

Edmonton.—With every manifestation of sorrow and respect, the body of the late Charles W. Cross, K.C., first attorney-general of Alberta, and since 1905 prominent in public life in the province, was laid to rest here. The crown, the province, the city, bench and bar, the various other learned professions, and men who are leaders in many diverse activities united in the last tribute. The funeral service was conducted by Rev. Dr. D. G. McQueen, pioneer Edmonton pastor.

Grant For Health Department

Ottawa.—For the Federal Health Department, \$687,000 has been passed by the House of Commons. The votes included \$120,000 for administration of food and drug acts; \$210,000 for marine hospitals; \$200,000 for quarantine, and \$100,000 for venereal disease.

PROTEIN CONTENT BEST BASIS FOR GRADING WHEAT

Ottawa.—The proposal that the protein content be made the basis on which wheat be graded was dealt with by the committee on agriculture in its report submitted to the House.

It came to the conclusion that the nearest approach to an ideal index of the baking strength of wheat was by determining the variety and quantity of protein, the latter to be ascertained by chemical test. At present the baking strength is determined on the variety and percentage of hard kernels.

The report stated that so far as export trade was concerned there was not sufficient evidence as to the effect of the proposed change from the present system of grading to that of the protein test to warrant a recommendation that it be adopted, but did recommend that a full inquiry into that phase of the question be made.

The committee also urged that seed warehouses be maintained to collect and distribute seed of approved varieties; that an experimental flour mill be established; that inspectors be stationed at all transfer points between the Head of the Lakes and the seaboard in order to prevent mixing of wheat.

The changes, if carried out, would necessitate amendments to the Canada Grain Act.

The resolution states that in Canada, Great Britain and the U.S., and probably most other countries consuming Canadian wheat, baking strength was an important factor in deciding its value, and this strength means the quantity and quality of protein.

Except in the case of Durum wheat, at present graded in a class by itself, and possibly one or two other varieties grown in relatively small quantities, the protein in Canadian wheat could be assumed to be good quality.

Cost of making protein tests should range from 50 to 75 cents, which would not be a serious difficulty notwithstanding the fact that laboratories would have to be installed at all inspection points. The committee suggested that data be obtained as to the cost of installing and maintaining laboratories. Individual tests would require about two hours. A large number of tests could be conducted simultaneously and there would be no delay in testing and dispatching cars to terminal points.

The definite proposal in the resolution could be put into effect insofar as carlot shipments were concerned. The committee was not satisfied that wheat sold locally in wagon loads could take advantage of this scheme. This practice of Kansas City wheat pool members, whereby farmers and elevators forwarded supplies jointly to laboratories, pointed a way to solution of the strong wheat problem and should be investigated.

Introduction of protein as a factor in wheat grading would be an incentive to grow the best milling varieties.

According to L. H. Newman, Dominion cerealist, and in the opinion of the agriculture committee, these grades are classed as desirable: Early Red Fife, Marquis, Ruby, Red Bobs, Selections, Renfrew, Kitchener, Garnet and Reward.

The cereal division of the Federal Department of Agriculture and provincial governments should continue efforts to zone Canada's wheat area with a view to varieties most likely to prove satisfactory in each case.

The committee expressed the opinion that Garnet Wheat, hitherto excluded from No. 1 Northern, should be eligible for that grade.

Brandon Goes West

Brandon, Man.—Brandon, noted prohibitionist centre of the province, went "wet" when the electors voted in favor of the opening of beer parlors in the city. The vote was: "For," 3,214; "Against," 1,931, a majority of 1,283.

The tourist who takes his automobile to Europe with him, can now arrange to have it ready for him at the time he lands, with the tank filled and the licenses procured.

Here and There

(79)
The Rocky Mountain Lakes fish-
ing season was opened recently
with a catch of a thirty-two pound
lake trout by George Andrews of
Barr, in Lake Minnawaska. A
number of others of not such a
great weight were caught by guests
of the Barr's Spiceway Hotel.

The month of April was the most
successful so far this year from the
standpoint of families settled, ac-
cording to a statement issued by
the Canada Colonization Association.
During the month 81 families
were settled throughout the Dom-
inion on 15,245 acres of land, bring-
ing the total of settlements from the
first of the year up to 221 on
46,207 acres.

There are in Alberta today 77,192
farmers who have 834,224 horses in
use and 10,226 tractors. In Saskat-
chewan records show 116,763 farm-
ers with 1,199,666 horses and 24,367
tractors. Manitoba has 51,200
farmers with 350,480 horses and 10,
823 tractors. The survey would
indicate that while the horse is yet
far from being a back number on
Western Canadian farms, the day
of the tractor has definitely arrived.

Miss Jean Cameron, who came to
her parents from England at the
age of four, at ten commenced
trapping in the district of her
father's homestead. Today, at the
age of 21, she finds it quite a lucra-
tive and congenial pursuit, and
quite superior to the work of her
youth which would keep her in the city.
She follows a trap line within a ten
mile radius of her home and her
catch includes coon, lynx, weasel
and fox.

A record passage by a freighter
and one that has only been expected
of a passenger ship was recently
accomplished when the Canadian
Pacific Cargo steamship Beaver-
burn docked at the Burrard Comm-
ercial Docks, London, nine days after
leaving Montreal. The trip was the
first out of Montreal of one of the
new "Beaver" vessels and this re-
cord will be clipped by from twelve
to fifteen hours more than the Beav-
erburn and vessels of her class are
routed via the Straits of Belle Isle.

Seed growing is one of the latest
industries of Vancouver Island of
steadily increasing importance.
Vancouver Island sweet pea seed
sells on the British market from
three to four shillings per pound
more than the California seed. The
largest sweet pea seed farm is at
Duncan which produces yearly
about two tons. From 15 to 20
men are employed each year to
pick, clean and pack the seed, the
excellence and high quality of which
is becoming world-famous.

All the sport of fishing with a
minimum of destruction of fish was
realized recently when a party of
four members of the Isack Walton
League of America enjoyed a for-
tunate salmon fishing on the Cairns
River, New Brunswick. The party
took 160 salmon and returned them
all to the water within twelve. The
fish ranged from 25 pounds to a
weight of fifteen lbs and were
taken with barbed hooks and
streamer flies. Very fine sport was
enjoyed but the fish were in no way
injured, when returned to their native
stream.

CHAPTER XXV.—Continued.

Sam had been in our law courts. He had listened to many learned friends disagreeing with other learned friends, and he had become somewhat of a learned friend himself. He had one rule, "admit nothing—deny everything—remember you were not there when it happened." So, when a well-dressed young man came asking for a Finnish girl for red hair Sam knew nothing. In Sam's limited sphere the relations between men and women were elemental and simple. Maybe the police wanted his red-haired girl—that might be. Well Sam did not want to lose her. She was a good girl, honest girl—she rang up the right change. Sam did not usually trust any white girl—white change, but he was glad now that he had found one whom he could not catch, for it might be she was honest all the time.

"No," Sam did not know—Sam did not know anything. Sam did not tell Helmi, either, "nice girl, Helmi—if wants fella she could get plenty—no use gettin' nice girl all excited."

Helmi went back to the "Good Eats Cafe"—one day to see if it would be possible for her to be given longer hours. The dollar a night was not going to be sufficient for her needs. Her room rent was fifteen dollars a month, and even at that she suspected the Corbets were paying some of it. She would like to go to work at two o'clock in the afternoon if Sam could arrange it. He had been away for a few days and another Chinaman had been in charge.

When Helmi arrived old Sam was at his accustomed place behind the desk, very elegant in a new black suit and a white tie. He wore a white flower in his buttonhole, and resembled a church usher on Mother's Day. Helmi remembered how they looked in Miss Abbie's church. He was very friendly with her, and bowed cavalierly over her head. Helmi had learned to suspect polite men of being

"A GREAT TONIC," SAYS MRS. RUSSELL

After Taking Lydia E. Pinkham's Vegetable Compound

Fenwick, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the change of life for nervous feelings, loss of appetite and to gain strength. It is a great tonic and I have taken a dozen bottles of it. It was recommended to me by a friend and now I recommend it to all women for such troubles as come at this time."

—Mrs. W. V. RUSSELL, R. R. No. 2, Fenwick, Ontario.

W. N. U. 1737

drunk, but old Sam was always sober. The cafe, too, was festive in its appearance. Flowers in bloom were on the tables. A drooping fuchsia in the window rained its crimson and purple blossoms down like a spraying fountain, and squares of embroidery hung on the walls. Helmi wondered at the changes. It must be some Chinese holiday, she thought.

Sam came around from the desk to greet her, and she noticed further improvement—Sam had false teeth, with some gold ones. His nails were daintily manicured and his hands heavily perfumed. "Nice led-haired girl," he said, shaking her hand sideways, "good girl, really. Old Sam got nice little white girl now all his own. Soon she come, my girl—grand girl—Mrs. Sam Lee—drive big car—my girl."

As he spoke a big gray car with silver mountings drew up to the curb, and a lady in a scarlet suit came out. She came into the "Good Eats Cafe," filling the doorway with color, like some strange tropical bird. Helmi's eyes were so dazzled by the vision that in her admiring survey she had not yet reached the face.

A shout came from under the drooping black hat, and the beaming lady bore down upon Helmi. "Helmi, my love, come to me! I always knew I would find you."

"Rose Lamb!" cried Helmi, breathless with excitement. "Rose, are you out?"

"Hush," cautioned Rose, dimpling and drawing her shoulders up. "I was never in. I and I met at a Young Ladies' Seminary—no tradesman's daughters allowed—remember? Not that good old Sam minds—he's been in jail, and it makes them broad to go to jail; but for the sake of my social position, mum's the word. Sam, take you two please. Sit down Helmi, and let me look at you."

Have you been converted lately? O Lord, do you remember how we were prayed over? I got to be their little pet lamb—pure as the driven snow—but I drifted! Well where have you been?"

"Married?" That's bad. But I knew it. I saw it in you—you were that kind. And your man has sort of been misled, temporarily. He is only a miser—let him go—his beastly poor pay, I hear."

"But I want him to come back," said Helmi. "I love him, Rose."

"Ain't that like you, Helmi? Of course you do, and you have a baby, and I suppose you keep it too."

"I sure do," said Helmi.

Sam Lee had gone into the kitchen, and Helmi leaning close to Rose said: "Rose, did you marry old Sam?"

"Kid, you've said it," replied the bride; "sure did—license, ring and all, Sam Lee, widower, Rose Annabel Lamb, spinster—Anglican clergyman doing the job."

"Rose, how could you? He is not only a Chinaman, but old—very old; he must be at least sixty."

"Sixty?" Rose almost shouted. "Don't kid yourself—he's eighty. I've heard it at anyone you like, but he might outlive me. Sam is safe—he'll snuff out like a gentleman. Little Rosie, all alone—think of it—with some forty thousand bones. How's that?"

"No good," said Helmi, shaking her head. "no good."

"Kid, I couldn't work. I hate dish-water and I couldn't scrub—it always made my nose sore. I hate work and what could I do? If I had lots of money I'd run straight. Old Sam is not so bad, and the gray car is a pippin."

Come and see our house, Helmi; it's swell—rugs of blue and rose, with one little tea house in the corner; tapestries in gold blossoms, lamps of hammered brass—oh, come and see it. Sam, none more ginger! Thanks, old top. Lots of room for you, too, Helmi. I'll give you a room in rose and gray with fresh flowers every morning. Come Helmi, let's have a little run in the car. I've been pinched once for speeding, but I'm careful now. I want to tell you about what happened after you left."

Helmi went with Rose to the car and stepped in after her. The sudden rush of air, the delightful feeling of motion, the sensation of freedom, with these Helmi's fears fell away, impulsively she hugged her friend's arm. "Oh, Rose, its good to see you," she said.

Two men on the sidewalk regarded them closely. One watched them with

Badminton players find a drink of hot tea of great benefit after a strenuous game. In leading Badminton clubs of Canada, Red Rose Tea is a great favorite. No other tea offers such brisk, zesty flavor and rich quality. Put up only in bright, clean aluminum packages. MEW

wicked-wise eyes, cynical and hard, the only gleam of gladness in them due to his suspicions being verified. The other man's eyes burned with a great sorrow and a bitter disappointment.

"You see what I said," remarked the first, "that woman driving the car is well known in the underworld. Later she has come here as the mistress of a rich Chinaman. The Finnish girl is one of the gang, as you can see. Mr. Doran, you are well out of it."

Jack leaned back against the doorway, sick at heart.

"Now I want to tell you something," said Major Gowslett, for it was he; "that girl has no legal hold on you. Col. Blackwood did not record the marriage. He knew her history, you see. She has therefore no hold on you, so do not worry about that."

Jack turned away without speaking. The loom of life went on with its weaving, but from Helmi's life its golden thread had gone. But, of course, the flying shuttles cannot stop to look for ends. The loom of life does the best it can with the threads its shuttles are able to bring, but it takes no responsibility for the pattern.

CHAPTER XXVI.

Mrs. Kalinski and Mrs. Corbett were having a cup of tea in the latter's big room one afternoon when Mrs. Corbett had finished her duties as janitor's wife who could be got by the hour to "do out" rooms for the tenants.

"I've turned out Mrs. Rowan and Mrs. Sulder today, given Mrs. Brown a lick and a promise, and put Mrs. Flickdahl off until tomorrow," said Mrs. Corbett, as she set the peanut butter and strawberry jam on the table and proceeded to cut slices from the loaf. Mrs. Kalinski was still "waiting."

"It's a long time—the last month," said Mrs. Corbett soothingly, "sure every day brings it one day nearer, and it's yourself has everything ready and fine and nothin' to do but to hop into bed and catch the neighbors and good old Dr. Eckhardt. I never saw a woman any readier than you are, with the name and all."

(To Be Continued.)

Our Foreign Words

Few People Know That Hundreds Are Used Every Day

How many foreign words do you use in a day? Perhaps hundreds.

It is true that by usage many words have become part of our own speech, but it is not so with the Scandinavian, yach, Dutch, waltz, is German, phantom is Greek, and extra is Latin.

Nearly every military term is French, grenade is Spanish, macaroni is Italian, cante is Portuguese, chintz is Hindu, iliac is Persian. Sabbath comes from Hebrew, alcohol is Arabic, bosh is Turkish, sago is Malayan, and tea is Chinese.

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 30 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Glass Windows in Ancient Times

Art of Glass Making Was Known To the Early Egyptians

Glass windows are not the relatively modern things they are commonly reputed to be. According to Dr. M. Blaschke, a German ceramic chemist, they were in use in ancient Rome. Most of the panes did not exceed 12 by 18 inches in size, though a few larger ones have been found.

Glass-making, known for many centuries in Egypt, came to Rome relatively late. During the time of Cicero, who died in 43 B.C., glass objects of any kind were rarities, and glass windows were unknown. A hundred years later most households owned some, and by the time the empire was well established glass was fairly common. The famous mosaics of the later empire, notably at Ravenna and Constantinople, were made largely out of bits of glass.

AVOID THE PAINS OF RHEUMATISM

This Trouble Comes Through Weak, Watery Blood

Many people suffer rheumatic pains that can be avoided by building up the blood. Rheumatism comes with thin, watery blood, and can only be driven out of the system by enriching and purifying the blood. To make rich, red blood no medicine equals Dr. Williams' Pink Pills. These pills actually make new blood, driving out all poisonous secretions, and creating a condition of robust health. Thousands of rheumatic sufferers can testify to the value of Dr. Williams' Pink Pills. One of them is Mr. J. A. Tully, Belpayson, Ont., who says:—"As a worker in the woods for years I have been exposed to all kinds of rough wintry weather. The result was that I was finally laid up with rheumatism. I could hardly stir, and was confined to bed. Medicine seemed to have little or no effect and the best encouragement, the doctor gave me was with the coming of warm weather I would be better. But instead of getting better, I grew worse. My joints were badly swollen, and my legs so stiff they would hardly support my body. At this stage I read that Dr. Williams' Pink Pills were recommended for rheumatism and decided to try them. The result was just what I expected. After a few weeks the swelling had disappeared, and the stiffness gradually went away. I was much stronger than I expected all traces of rheumatism had disappeared. The next winter when I went into the woods I took a supply of Dr. Williams' Pink Pills with me, and they kept me in the best of health all winter. My experience should give encouragement to other rheumatic sufferers."

You can get these pills through any dealer in medicine, or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

CROOKED TEETH

Nature is no bungler; but plans wisely. So it is that she has intended teeth should occlude, or come together, in certain definite relationships with caps interlocking as "the cogs of two wheels which work in harmony." But quite frequently her aim is thwarted, and there is an abnormal relationship known as mal-occlusion. Many and varied causes as we have been cited contribute to this condition as: medianline extractions; decayed shedding; tardy eruptions; improper masticating habits; faulty diet; deforming habits of the young child; and general diseases affecting tooth development.

But there is a type of mal-occlusion, without the so-called "crooked teeth," or teeth that may in fact be exceptionally well formed and placed normally in the arch, so that in this type the arch "per se" is satisfactory, either exhibiting a deformity, or being in improper relationship to its fellow.

Mal-occlusion may be very noticeable, evincing a protruding or retruding teeth, or teeth that are crowded, but again, the facial contour may not be altered from normal to any appreciable extent.

Apart from this relationship to facial expression, however, mal-occlusion may lead to serious disturbances of the teeth themselves.

It may be that due to this condition that one or several teeth are receiving excessive stress, resulting in a diseased condition of the tissues enclosing the tooth, or teeth, and menacing the life of the teeth involved. Moreover, teeth that are not functioning properly through disease, may be weakened structurally, leaving them more prone to decay; and in any event, they are not receiving the benefits of normal tooth exercises of the mechanical cleansing, through excessive masticatory movements, which after all is the best defence against the forces of tooth decay.

Little Helps For This Week

"All things whatsoever ye would that men should do to you, ye even so to them."—Matthew vii. 12.

And each shall care for the other, And each to each shall bend, To the poor a noble brother, To the good an equal friend.

—Ralph Waldo Emerson.

No cease has fallen on us till we cease To help each other.—George Eliot.

Try to do others as you would have them do to you, and do so be discouraged if they fail sometimes. It is much better that they should fail in obeying the greatest rule laid down by our Saviour than that you should.

—Charles Dickens (Letter to his son)

Queer Law In Venezuela

Two Horns Must Be On Every Motor Vehicle

One horn is not enough for the automobiles of Venezuela. Under the latest law, double facilities for making a noise are required in that republic, a hand horn for the city and electric horn for the country. Actual practice shows that the drivers usually do not stop with two horns, but have three, one hand operated and the other two electrical. The button for one of the electric horns is on the steering wheel, while the other is placed on the left door of the car and is operated by pressure of the driver's knee.

Some men's only business is pleasure and the only pleasure of others is business.

Gum-Dipped Tires Save You Money

Gum-Dipping is an exclusive Firestone process. It insulates and impregnates every fibre of every cord with rubber and prevents the cords from chafing against each other.

In ordinary tires these cords are unisolated. In flexing they chafe against each other, causing internal heat and friction which softens the rubber, causing blowouts and tire failure.

These better tires cost you no more, yet they give thousands of extra miles. See your nearest Firestone Dealer.

FIRST-CLASS ACCOMMODATION FOR TRAVELERS. EUROPEAN PLAN.
RESTAURANT IN CONNECTION

Stony Plain and District.

The death occurred at the General hospital, Edmonton, of little Teresa Nichols, the daughter of Mr & Mrs G A Nichols of Blueberry, on June 4th, 1928. The illness was of short duration. Everything possible was done to save the young life, but she succumbed a few hours after an operation; the end being a severe shock to her parents and friends.

There was a family reunion on Sunday last at the home of Mr & Mrs T Graden at Comet. All members of the family were present, Mr Wm Graden coming up from Medicine Hat, to be present.

While Stony Plain District has been doing fairly well along the line of wanted moisture, some districts seem to have been doing too well. A former farmer resident of this district who moved to Namayo reports the loss of some twelve acres of oats which were drowned out from the effects of too much rain.

The death is reported at Fort Smith of Mr Wm Alexander, a former resident of Inga district, having farmed there for a number of years.

U. F. A. dances at Holborn Hall the evening of Friday, June 22d.

The store and restaurant at South Edmonton Beach is now open. Messrs Atkinson and Braithwaite are the proprietors.

M. M. Mecklenburg, the well known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, June 1st. See him and agree well.

Sporting Notes.

A junior ball game was played on local grounds on Saturday, between the Public school team and St Matthews. Score: Public school 10, St Mat's 9. Batteries—St Mat's, Buster & Wudell; Publics, E Lory & Willie.

The ball game on Sunday at South Edmonton Beach, between the Carvell team and Walter league, resulted in a win for the latter by 20 runs to 6.

Edmonton Beach Notes.

Edmonton Beach had another successful dance Saturday night, when a big crowd motored to it from the City and surrounding district.

Next week end will see the first baseball match, and no doubt there will be some fast playing. There will be enter tainers from Edmonton present.

Mr Goerz has appointed Mr Uglov, on the Edmonton Beach farm, as poundkeeper for Edmonton Beach district.

Contractor J Desrochers of Edmonton has purchased a number of lots from Mr Barrie, and intends erecting some neat cottages thereon.

Mr Barrie has cut the price of the dance to 75c, to accommodate everyone.

Rather Short Notice.

The wood inspector made calls in our district last week and had farmers sign agreements to have their patches of Canadian thistle destroyed inside of five days, altho no human being to our knowledge has been able to do it in less than one season, so far. The blanks were drawn up by a Farmer Government.—Swan Hill news in Hay Lake Times.

Spruce Grove News

Mr Joe D Miller, the genial proprietor of Spruce Grove hotel, is having his house re-decorated and painted.

His many friends will be pleased to hear Mr Philip Schwindt has recovered from his recent indisposition.

The new Northern Grain Co.'s elevator is now open for business, Mr Christensen, the manager, announces.

The two new houses north of Peace church being built for Messrs Barnhart and Tomlinson, are nearing completion.

On Sunday last, June 10th, at 10 a.m., the Rev Andrew McCann, C.S.S.R., of Winnipeg, opened a mission at St Joseph's church. This week masses are being offered at 6.30 and 8.00. Rev Father McCann has preached many successful missions in all parts of Canada, and is a forceful pulpit orator.

The Morravs have moved their premises formerly occupied by Mr A Anderson.

Mr E J Willet, Edmonton, was a visitor here over the week-end.

Butcher MacKean predicts a rainy season this year, with bumper crops for farmers in Spruce Grove district.

Reinhold Goerz, with a gang of road workers, has made a good job of the fill on the approaches to the bridge over Dog Creek, on the Baseline.

Montgomery & Krenz shipped a carload of charcoal, this week, to the City.

Two chaps from this district were fined in an Edmonton Court last week, for being found in a City beer-parlor while under the age of 21 years.

Found, on the Baseline, near Spruce Grove, motor license number 65583. At Sun Office.

Swam to Liberty.

Mrs J Davies, who owns a muskrat farm at Kapassiwini Beach, reported the loss, last week, of a pair of valuable rats and its young brood. Suspicion rested on some dark brown natives from a nearby Indian reserve. An investigation was made by the authorities. The theory is now held that the aquatics escaped from their den, took to the water, and beat it.

INGA MUNICIPAL DISTRICT
NO. 520.

Notice is hereby given that if all arrears of taxes imposed in 1927 in respect of any parcel of land situated within this Municipality are not paid on or before the First Day of July next, such land will be dealt with under the provisions of The Tax Recovery Act, 1922, with a view to obtaining certificate of title in the name of the Municipality in respect of such parcel.

E. H. PIDGEON,
Secretary-Treasurer
M. D. of Inga No. 520.

U. F. A.
DANCE!
HOLBORN HALL,
Friday, 22nd of June.

Duffield Doings

Saturday, June 23, is to be the Big Day here; this being the occasion of the annual picnic. Full program of athletic events, Dance in evening. Tyrrell's orchestra.

About 2 o'clock Mr Albert Hanna, whose farm is about four miles northwest of Duffield, was awakened by smoke issuing from the kitchen. Hastily summoning the members of his family, they barely had time to dress when the flames enveloped the building. The house was a total loss, with the contents. The family was taken in and given shelter by Mr F J Francy, a neighbor. Mr and Mrs Hanna and their two children moved up, about a year ago, from the dry belt. Some insurance was carried.

The sale is reported, this week, of the E 4 24, 52, 3w5, to Mr John Schlitt, of Stony Plain district, for approximately \$975 an acre. This half-section lies about three miles southeast of Duffield, and was formerly owned by Mr Mike Turlock. Mr Schlitt has a party of brush-cutters at work on this piece.

Mr Best took in a shipment of livestock on Tuesday.

Carvel News

On Sunday, June 17, at 10 a.m., Rev Father McCann will begin a mission at Carvel. Evening services will be held at 8 o'clock and week day masses at 8.30 a.m. An invitation is extended to the general public to attend.

Several farms in this district have recently been visited by members of Mr Shur's Liquor Squad.

Meredith Bros. are buying hogs and cattle at Carvel every week.
